

Homepage/loginpage —>alignment make it down

In this page→ check the alignment of hamburger,logo,JW(login)
Check for the padding bottom below next button too much space is there

Space between the search and class button is too much and class dropdown not highlighted

Guidelines:

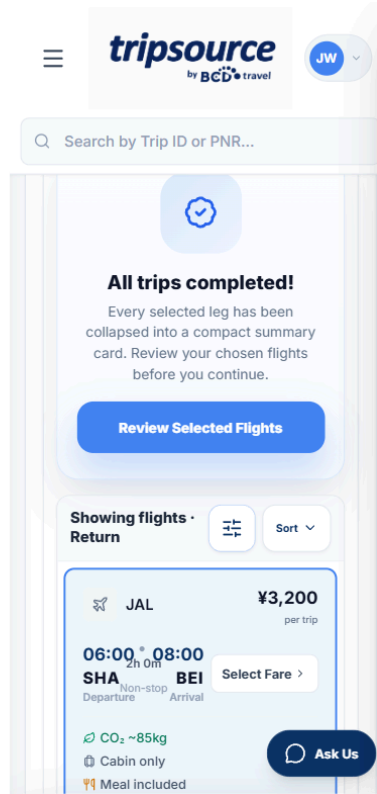

MMt like

Focus on hotel and flight section

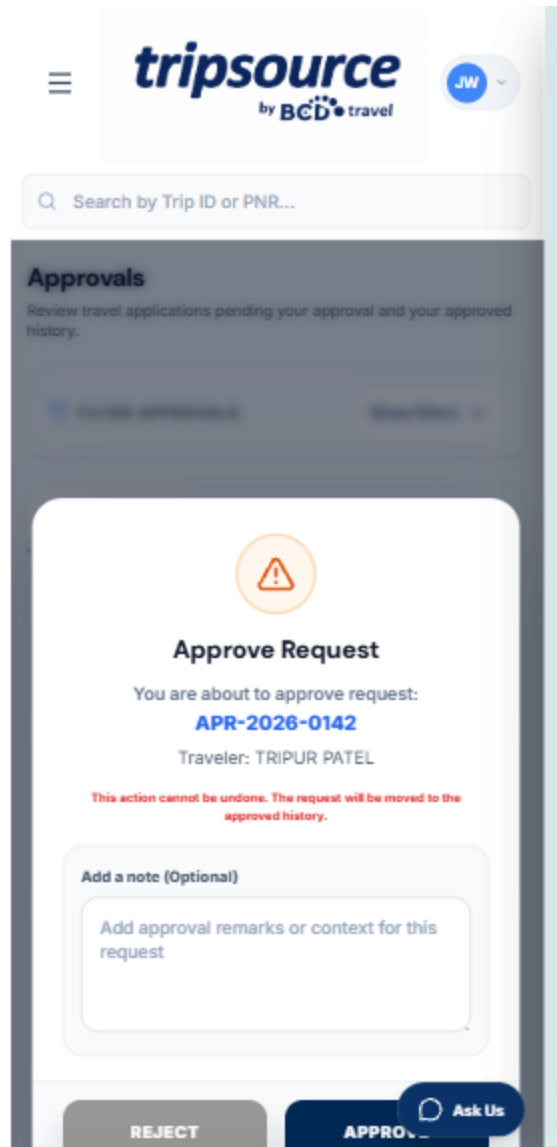

Photos hotel section —> cards

Japanese name remove—>

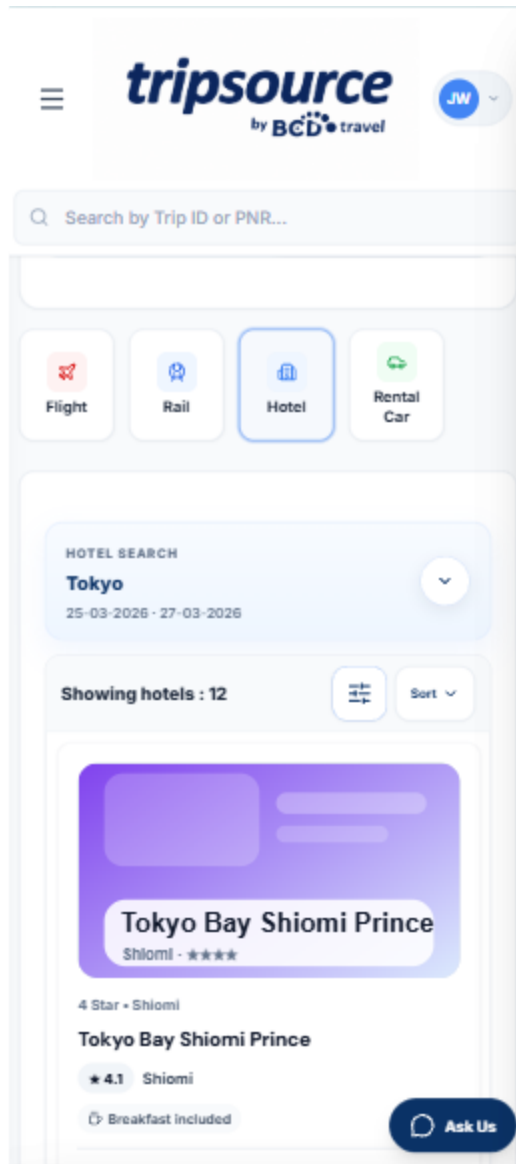

Add notes section—>pop up for accepting or rejecting approval—> why approve request—>breaking in mobile devices

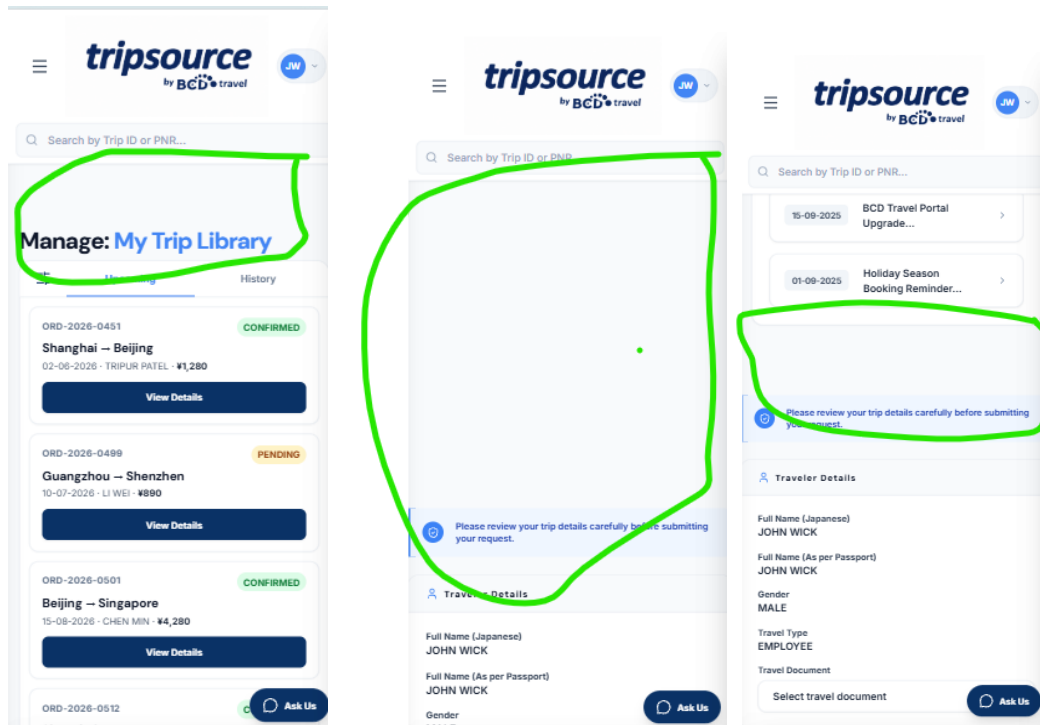

In flights after selecting the fare and flights we must not see the showing flights return results
The time of flights and overall results is very congested

In this page the Approve request is getting too much downsize and gets crashed on other devices

Hotels images not been updated

Too much space from search bar to the manage:my trip-library
Spacing issue too much space left

Numbers are up-down Pending Approvals,New Requests,Approved Request
